Re: Freedom of Information Request

Request/[Response](#):

1. When reporting monthly counts of MRSA cases what procedure do you follow to distinguish between health care associated infections and livestock associated infections?

This is not relevant to NHS South Sefton CCG. All reported MRSA cases to the CCG are health care related. You may wish to redirect your request to Sefton Local Authority at information@sefton.gov.uk

2. Please provide, for the last five years, monthly counts of livestock associated MRSA cases in your CCG. If monthly counts would be too time consuming to provide then please provide yearly totals for the last five years.

This is not relevant to NHS South Sefton CCG. You may wish to redirect your request to Sefton Local Authority at information@sefton.gov.uk

3. For each case of livestock associated MRSA in the last five years I would like to know: the cause of the infection, the source of the infection, the duration of treatment, and the outcome of the case.

This is not relevant to the NHS South Sefton. You may wish to redirect your request to Sefton Local Authority at information@sefton.gov.uk.
